

OĞUZHAN KAHYAĞLU

8+ YRS. SOFTWARE ARCHITECT, FULL-STACK DEVELOPER; ISTANBUL/TURKEY

OGUZHAN.KAHYAAGLU@YAHOO.COM

Tech Influencer! Loves to spread dev-related info;
I deeply love JetBrains products. At the same time, I am deeply connected to KISS, DRY and YAGNI principles.

Within Enerjisa (current employer), we develop high quality products, following the latest world-wide software development standards; **unit test**, **sonarqube quality gates**, **ui test** etc.

Tightly connected to Agile principles. For the last 2 years, I have been working with Trunk-based development and using Feature-toggling as needed.

.NetCore, Heroku, Azure, Unit Test (xUnit) Resharper/Rider Microservice, LLBLGEN, Entity Framework Core, Javascript, LESS, **AspNetZero**, **AspNetBoilerplate**, **Mediatr&CQRS**, **Regex**, **Hangfire**, Jenkins, svn/git, **Teamcity**, **Octopus**, **TestProject/Selenium**, Contentful, HeadlessCMS, **and more!**

EXPERIENCE

SOFTWARE ARCHITECT

ENERJISA URETİM

Within Enerjisa Uretim, we develop corporate projects that are being used in our powerplants all over Turkey.

We work fully Agile by the way. Unit test and UI testing is so much important for us in order to ensure high quality of our projects.

I can clearly state that we are developing **.netcore&Angular 8 stack** applications using **Aspnetzero/Aspnetboilerplate frameworks**.

Tech Stack: AspnetBoilerplate, AspnetZero, Angular, Typescript

2019 Jan - Present

LEAD DEVELOPER

VEKTORA CONSULTANCY

I have been working as a Lead Consultant (formerly, as Senior Consultant) in Vektora, within the department of Microsoft. We are implementing huge integrations, internal and external web application according to our customer needs. As consultants, we are 7/24 reachable due to the fact that we are responsible of huge external systems like:

Vestel.com.tr, Regal-tr.com, Garenta.com.tr and so on.

I am also responsible about Framework Development within the company, which is being distributed among most of our projects.

Tech Stack: soa architecture, wcf/asmx, webforms, mvc, .netcore, ef, ninject, svn/git, ms sql, heroku, jquery, and many front-end technologies.

Dec 2016 - Jan 2019

SENIOR FULL-STACK DEVELOPER

INSTAMEDIA WEB AGENCY

Hostamedia could be counted as my first professional software experience; I started there as junior developer, worked for almost 4 years (with a 6 month break due to military services).

The company is so popular within the Hotel Websites sector of the web agencies; they got strong references like The Marmara Hotels, The House Hotels, Avantgarde Group and so on.

We were mostly doing back-end integrations to their prebuilt CMS systems. After some time, I started developing plugins for the CMS systems and contrib part of the company Framework.

Technologies being used: Webforms, LLBLGEN (instead of EF), .net 3.5, svn, ms sql, jquery and many other front-end technologies.

Oct 2012 - Nov 2016

EDUCATION

BOGAZICI UNIVERSITY

MANAGEMENT INFORMATION SYSTEMS

Within the enjoyable department of MIS , I had education about numerous topics of business life additional to software development.

Additionally, I had extra courses from Computer Science and BIS Departments which would be helpful in my future life, in my opinion.

When it comes to my thesis, I created a project using AHP algorithm of Decision Support Systems.

GPA: 3.05

2007 Sep - 2012 Jan

MAÇKA AKIF TUNÇEL ATL HIGH SCHOOL

COMPUTER SOFTWARE DEVELOPMENT

Computer science tack

2003 Sep - 2007 Sep

SKILLS

BACKEND DEVELOPMENT

- ♥ Resharper, Rider & Webstorm (Long live JetBrains products!)
- ✓ C#
- ✓ .net core
- ✓ MVC
- ✓ Entity Framework & Entity Framework Core, Dapper, LLBLGEN
- ✓ CQRS
- ✓ Unit Test (xUnit)
- ✓ Design Patterns
- ✓ WCF Services
- ✓ Rest Apis
- ✓ Nuget Package Development (see my nuget profile)
- ✓ CI/CD: Jenkins, Teamcity, Octopus
- ✓ Microsoft SQL Server, Redis, MySql, Cosmos DB (a little bit)

CLOUD PLATFORMS

- ✓ Microsoft Azure (Kubernetes, Storage, Azure Functions etc.)
- ✓ Google Cloud (Storage Services)

FRONTEND DEVELOPMENT

- ✓ HTML/Javascript
- ✓ jQuery
- ✓ Photoshop

PORTFOLIO

PPM (POWER PLANT MANAGEMENT)

ENERJISA URETİM

Within Enerjisa Uretim, we develop .netcore/angular8 applications that are being used in our powerplants. Fully implementing Agile principles, we develop high quality softwares using unit/ui testing and jenkins pipelines/sonarqube quality gates/trunk-based development and so on.

Tech Stack: AspnetBoilerplate, AspnetZero, Angular, Typescript

2020 Jan - Present

KALE COMMUNITY PORTAL

VEKTORA

Kale Community portal is a facebook-like project for handymans. We renewed the project using .netcore framework, integrating salesforce and hosted it on Heroku. Integrations are both running on Hangfire for scheduled jobs and on-demand rest-api queries, too.

Tech Stack: .net core, redis, heroku, mongodb, postgresql.

2019

VEKTORA

YKK, our first .netcore project, 2 web applications, 1 web api, windows services, hangfire and some console applications composes this complex project. We tasted the new things came up with .netcore framework and we are very eager to use it much more.

Tech Stack: .net core

2019

GARENTA RENT A CAR [LINK](#)

VEKTORA

Garenta, a car-rental site; website, callcenter and branch screens are developed by Vektora. I have been working on all of the sites, integrations, services and anywhere of the project in order for our customer's needs.

Tech Stack: .net core

2017

VESTEL.COM.TR [LINK](#)

VEKTORA

I have been giving support for Vestel.com.tr. From pos integration, to SAP/CRM and many other service providers, we have been mostly working on integration. This is the highest traffic site of Vektora actually. In parallel, we tried to do our best in order to increase performance of the site within the last two years; which resulted in on a single machine, this website can handle more than 5K users easily.

Tech Stack: .net mvc, jquery, less

2018

THE MARMARA HOTELS COLLECTION [LINK](#)

VEKTORA

Oğuzhan Kahyaoğlu

candidate of us for Altın Orumcek that year.

Tech Stack: .net webforms, jquery, less
